JAKARTA INTERNATIONAL EXPO

INDONESIA INTERNATIONAL EMERGENCY DISASTER REDUCTION & RESCUE EXPO

ORGANISED BY:

SIEC 上海市国际展览(集团)有限公司
Shanghai International Exhibition (Group) Co., Ltd.

WWW.EDRRI.COM

EDRR Indonesia will deliver the first truly International large-scale event focusing on all aspects of disaster response and emergency preparedness. Whether Fire, Flooding, Landslides, Earthquakes, Public Order, Large Industrial Sites and Public Work Spaces, Pollution, Storms, Transport Safety and Accidents and more, Indonesia suffers many incidents. Of growing concern is various threats to life will worsen further with the onset of climate change, which will also increase the threat to a country's national infrastructure and public safety. With Indonesia's position in both the Ring of Fire and Alpid Belt, it ensures the mitigation of the threats Indonesia faces can only be met by a trained, well equipped reaction force.

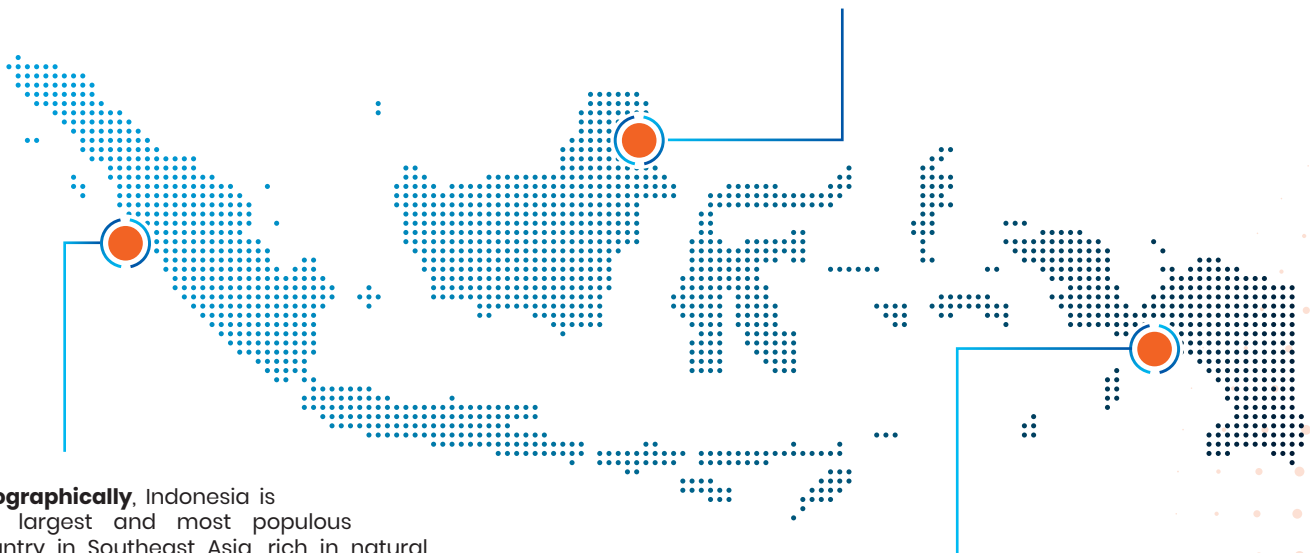

The mitigation and management of threats and incidents requires every Government's Emergency and Security Services, their First Responders, Security Agencies plus Business Leaders, NGO's , environmental specialists, Medical and Charity Organisations and private and public sector related organisation's to enhance and update their training and equipment which is paramount to building trust from the public and businesses in better protecting lives and the National Infrastructure. This ever-increasing responsibility is the primary focus of EDRR Indonesia. This timely event will provide a central platform for the latest thought leadership, training, communications, and equipment which will be showcased across the key practitioners who are responsible. The largest number of Government agencies and industry practitioners will converge at EDRR Indonesia in Jakarta to network and update themselves on the latest products and solutions

showcased in the industry sector exhibitor Pavilions segmented by Emergency Prevention, Fire and Rescue, Heavy Emergency Rescue Equipment, Public Security and Police Equipment, Flood Control, Industrial Safety, Epidemic Protection, Safety and Medical, Emergency Shelters, Communications, Transport Safety and Hazardous Materials etc.

The EDRR Indonesia Exhibition and Conference will therefore look forward to welcoming all related industry practitioners and Government Agencies to join us to network and share their experiences and best practice and discuss the latest insight amongst the region's leading experts and specialists to further enhance understanding, practices and drive the change to better protect their nations assets and the public.

WHY INDONESIA?

From a political perspective, Indonesia is the rotating presidency of the G20 summit in 2022 and will also serve as the rotating chair of ASEAN next year. Indonesia's influence in Southeast Asia and the world is increasingly prominent. By holding the Indonesia International Emergency Exhibition, deepening the cooperation and exchanges with the local political and business circles in Indonesia will also have a positive and far-reaching impact on the exploration of all-round cooperation for Asian countries.

Geographically, Indonesia is the largest and most populous country in Southeast Asia, rich in natural resources and an important geographical location. Southeast Asia has been one of the most natural disaster-prone regions in the world, especially Indonesia, which has been hit by natural disasters such as earthquakes, volcanic eruptions, tsunamis, landslides and mudslides over the past few decades. Improving disaster response capability is related to the national economy and people's livelihood and long-term development. Indonesia and Southeast Asia have generally stable political situation, good economic growth prospects, large market potential, good business environment, and a booming domestic demand market for safety and emergency response.

From an economic point of view, Indonesia is the only country in Southeast Asia with a total GDP exceeding one trillion US dollars and an important economy in Asia. In 2021, the bilateral trade volume between China and Indonesia will exceed US\$120 billion, a year-on-year increase of 58.6%, ranking first among ASEAN countries. In the context of the implementation of RCEP, the establishment of the Indonesia International Emergency Expo as an important exchange platform for regional cooperation will release more new momentum for China-India economic and trade cooperation.

EVENT HIGHLIGHTS

BUSINESS MATCHING

OUTDOOR DISPLAY

WORKSHOP & LIVE DEMO

EXHIBITION

CONFERENCE

EXHIBITORS PROFILE

- Emergency Disaster Prevention and Mitigation
- Technologies and products for emergency command, communication, information sharing and pre-judgment
- Early Disaster risk warning monitoring systems and equipment, information receiving and sending systems technologies in the fields of various natural disasters, fire and safety, production safety, urban flood control, urban buildings, transportation ships, civil air defense, mine safety, safety of dangerous chemicals, power and energy, transportation, etc
- Navigation tech, 5G, AI technology emergency solutions
- Industrial Safety Protection and Epidemic Prevention Material
- Protective masks, helmets, protective equipment, etc
- Chemical and toxin prevention products, Poison filtering ventilation equipment, control equipment
- Dehumidification equipment, air purification equipment, civil air defense doors, protective valves, etc
- Aerial operation equipment, electrical safety tools, etc; Explosion proof and anti-virus devices, dust-proof, radiation proof, electric power, hearing protection products used in explosive gas, dust and other fields
- Epidemic prevention and rescue materials, first-aid equipment, etc
- Fire Emergency Rescue Equipment
- Fire fighting robots, fire pumps, fire guns, thermal insulation and fireproof doors and windows, etc;
- Special emergency rescue equipment for traffic, earthquake, aviation, mining, dangerous chemicals, civil air defense, flood prevention and other disasters ;
- Emergency rescue and demolition equipment, search and rescue equipment
- Emergency lighting, emergency power; Patrol robot; Unmanned aerial vehicle (UAV)
- Public Security and Police Equipment
- Law enforcement recorder, catcher, mobile police terminal, etc
- Bulletproof helmet, shield, etc
- Safety inspection and explosion elimination equipment, technical investigation equipment, night vision device, etc;
- Satellite emergency communication system, intercom, etc
- Intelligent explosive removal robot, life detector, etc
- Patrol vehicles, anti riot armored vehicles, law enforcement motorcycles, etc
- Flood Control and Urban Drainage
- Lifejackets, floating rescue ropes, flood control lighting tools, soil testing instruments, flood control instruments, water pumps, flood control materials, waterlogging drainage equipment, etc
- Heavy Comprehensive Rescue Equipment
- Large multi-function emergency rescue vehicles, large emergency fire rescue vehicles, flood prevention and drainage equipment, emergency rescue helicopters, emergency rescue ships, large firefighting rescue helicopters, large emergency command and communication vehicles, various disaster accident experience vehicles, etc
- Safety Emergency Experience and Science Popularization
- VR experience, safety education and training, special simulation operation for fire fighting, transportation, mining, power and etc
- Fire fighting and rescue training institutions
- Financial, insurance and other service institutions

VISITOR PROFILE

Government Agencies, Indonesian provincial and regional disaster reduction and rescue system, Relevant government departments of science and technology, national defense, industry, commerce, health, housing and construction.

Indonesian local meteorological, earthquake, fire and security associations, institutions, experts and scholars in disaster prevention and reduction

Community directly affected by the emergency

Indonesian local Chinese enterprises in construction, materials, industry and mining, transportation, energy, industry and trade

Emergency responders and public health officials

Relevant local industrial parks, Key enterprises in petroleum, chemical, construction and other security fields

Civil Defence

Trade Agents; Other safety related investment and financing institutions, risk assessment, media, training, social welfare institutions, etc.

Businesses, trade, and industry

Civilian rescue groups, community disaster prevention and reduction organizations; natural disaster volunteer organizations, etc.

THE VENUE

Jakarta International Expo (JIEXPO) is one of the leading company in the MICE Industry in Indonesia. As the largest venue area in Indonesia, JIEXPO is becoming one of the best for a MICE solution in Indonesia.

JIEXPO provides a flexible indoor area ranging from 2,000 m² to 50,000 m² and an outdoor area of up to 65,000 m² which is perfect for hosting various events such as exhibitions, concerts, meeting & seminars, and conference. Our indoor exhibition area is divided into two parts, namely the East Wing and the West Wing. The East Wing consists of Hall A, Hall D1 and Hall D2. These hall share connected and available up to 20,000 m². Meanwhile, the West Wing consists of Hall B, Hall C, as well as a connecting between Hall B3 and Hall C3 with an area of 20,000 m², as well as the Gedung Pusat Niaga (GPN) and Convention Centre which has a total area of 10,000 m².
